

Instruction on How to Connect to VPN

1. Before connecting to VPN:

- Download the Cisco VPN client from [here](#) if you do not have it.
- Contact Airliquide *Healthcare* IT Department if you do not have your connection profile.
- Make sure you have Internet access before connecting.

2. Connecting to VPN:

Launch your Cisco VPN client, and you will see a window looks similar with below:

Click Connect

3. After Connected:

You should see a yellow, locked padlock icon is now in your system tray (in the lower-right corner of your desktop, next to the clock).

Now you can access the sleep services.
