Equipment maintenance

Air Liquide Healthcare offers preventive and corrective direct maintenance of your medical gas dispensing equipment. Our qualified team is ready to help you optimise and maintain your equipment, ensuring you are fully compliant with Australian Standards.

Onsite training for staff

In addition to a series of onsite demonstrations of your new equipment, we provide you with an invaluable Aged Care Facility Guide. This is a continually updated resource that will become your go to for a wide range of medical oxygen and respiratory equipment. The updates are communicated to our distribution lists regularly.
